

Pipe Joint Box Bracket

Overview

The JBPM is a universal stainless steel mounting bracket designed for installing electrical equipment — including light fixtures and security cameras — alongside a junction box on pipes, chain-link fences, conduit, and other round structures. Tube mounting brackets are the strongest type of connector and can be used very widely, for example, for mounting wheels, connecting tubes in parallel and mounting fixtures. For large quantities, help with specification or installation, contact us to discuss contract pricing and credit accounts.

Packaging Type: Bundle of 50 units Steel Specification: DX54+Z100 to EN10346-2015 Single Layer Pull Test: 40kg (15mm Plasterboard) Double Layer Pull Test: 80kg.
