

Price-insensitive bending-insensitive fiber optic OM4

Overview

The Riser (OFNR) outer jacket is fire resistant and low smoke to minimize damage. The bend insensitive fiber patch cable has less attenuation when bent or twisted compared with traditional fiber patch cable and this will make the installation and maintenance more efficient. Fully certified to meet strict international safety and quality standards for the industry. ClearCurve multimode laser-optimized, bend resilient fibers are widely deployed to deliver high data rate, low latency transmission. It can compensate the signal degradation caused by the center wavelength shift of 100G/lane transceivers.

Price-insensitive bending-insensitive fiber optic OM4

ClearCurve® biegeunempfindliche Multimode-Faser , Corning

ClearCurve OM2, OM3, OM4, and OM5 wide band fibers are compliant with IEC 60793-2-10. They withstand tight bends and challenging cabling routes in data center and in-building network
