

Price of wall-mounted fiber optic cable

Overview

Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. Factors Influencing the Cost of Fiber Optic Cable Cable Construction: This is the most important factor affecting the price. Hi, I found Cable Monkey to be helpful and efficient - totally professional! Will definitely use them in the future.
