

Recommended Spectrometer for Foundry in Singapore

Overview

The SPECTROLAB as well as the SPECTROMAXx can be employed depending on the specialization, the number of casting processes and the semi-finished and finished products being produced. This handheld XRF analyzer offers NDT testing for scrap sorting and verification of ferro alloys, circulation material analysis, and other materials for melt correction, and finished steel components. We offer a range of thermal analysis instruments for the analysis of cast iron (melting). Spectrometers can be used for various applications, including optical emission spectrometry (OES). Optical spectroscopy is a technique that analyzes how light interacts with matter to reveal the spectral characteristics of a sample.

Recommended Spectrometer for Foundry in Singapore

Spark Spectrometer , Process Control , Metal Foundry

Hitachi High-Tech offers a range of spark spectrometers/OES analyzers for process control and to ensure the right melt chemistry within a metal foundry.

For OES & More: Spectrometers in Singapore

Looking for OES spectrometers in Singapore?
EastWest SVC is a

[Contact Us](#)

Foundry , Spectrocheck , Foundry Spectrometer for Metal Analysis

High-precision spectrometer for foundries offering fast and accurate metal composition analysis. Ideal for cast iron, steel, and alloy quality control

[Contact Us](#)

Spectrometers & Spectroscopy Equipment , Edmund Optics

Edmund Optics offers a range of optical spectrometers and compatible accessories. Our selection includes gas cells, reflectance standards, phantom samples, fiber optics, and light sources--along

Entry-Level Laboratory Spectrometer

OXFORD INSTRUMENTS describes its Foundry-Master Xline as "a reliable entry-level laboratory spectrometer for the qualitative and quantitative element analysis

[Contact Us](#)

Is your spectrometer producing the correct analysis? , Castings SA

Is your spectrometer producing the correct analysis? Operator and technician training is part of the solution. Developing a best-in-class

[Contact Us](#)

The spectrometer in aluminium sand casting

At the foundry, we use a spectrometer to verify the chemical constituents of every metal melt before it is poured to ensure that it meets BSI standards.
