What is the 'Remote Sense' function on a power supply?

This feature is advantageous to the user, but is subject to mistakes that should be avoided to insure the proper operation of the power supply and the end-product. Remote Sense -

The Key to Maximizing Network and Server Uptime

The solution for adding new equipment to existing power supplies is to perform power measurement verification. If, however, equipment units are co-located at multiple sites, then performing on-site

How to remotely sense our power supply

If we don't have a dedicated differential amplifier, we can still remotely sense our power supply. A remote sense resistor connects the load voltage back to the converter. It compares it to a
