

Removal of high-speed optical cable

Overview

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering techniques, tools, and best practices to help you achieve successful terminations in your fibre optic installations. Fiber optic cables provide blazing-fast internet speeds through pulses of light transmitted over glass fiber. However, situations may arise requiring you to disconnect these specialized cables from modems or routers. With delicate glass components and invisible laser operation, caution is necessary. Juniper Networks transceivers are hot-removable and hot-insertable field-replaceable units (FRUs). You can remove and replace them without powering off your device or disrupting device functions.

Removal of high-speed optical cable

Fiber Strippers - tools, mechanical, thermal, chemical,

Fiber strippers are precision tools that remove a coating from a fiber before connectorization or splicing. There are mechanical, thermal and non-contact
