

Riddles about cables and optical fibers

Overview

Presenter: In 15 minutes minutes we have mined, an incredible 10 bucks in gold. Fiber optic cables are thin, flexible strands made of glass or plastic that transmit data as light signals, enabling high-speed communication over long distances. Can you take on this tricky list of brain teasers, including riddles by Albert Einstein, without making a single mistake?

We've been in the lockdown for quite a while now, and if there's one thing we've learned for sure it's that working from home is a breeze with the right tools and that brain. Here are 40+ technology riddles that explore the world of technology! Test your knowledge and have some fun with these brain teasers about gadgets, devices, and digital innovations. What electronic component am I?

Q: I have a diode heart and amplify signals with grace.
