

Russian Active Optical Module QSFP

Overview

The QSFP-SR4-40G Optical Transceiver Module is designed for use in 40Gb/s FDR10 InfiniBand systems throughput up to 150m over OM4 or 100m over OM3 multimode fiber (MMF) using a wavelength of 850nm via a MTP/MPO-12 connector. The Quad Small Form-Factor Pluggable (QSFP) family represents a critical evolution in high-speed optical transceiver technology for data centers, telecommunications networks, and enterprise infrastructure. These hot-pluggable transceivers provide high-density, high-performance connectivity. By integrating four-lane signals into a single module, it supports four times the data throughput of the SFP while maintaining a slightly larger size. Simply put, 1x QSFP Speed = 4x SFP Total Speed. The typical QSFP+ vs SFP+ appearance is shown in the initial image. While 100G or higher has become the primary upgrade path for legacy networks running 1-10G, QSFP+ remains in use for specific applications. 40GBASE-SR Ethernet Links, Data centers, Data center Internal networks, Campus networks, Metropolitan networks, 5G wireless networks and other communication environments.

Russian Active Optical Module QSFP

Spec Sheet

QSFP+ 40G Active Optical Cables Siemon option for 40Gb/s high-speed Low data Power with four fiber optic transceivers per end, each operating at data rates from 1 to 10.5 center Active interconnects.
