

SC fiber optic patch cord keeps malfunctioning

Overview

Here are some common issues and corresponding troubleshooting methods for SC cables: Poor connection due to dirt or debris in the connector. Unlike backbone cables, patch cords are frequently connected, disconnected, bent, and handled by technicians, making them the most vulnerable. Maintenance personnel can refer to this document for step-by-step troubleshooting when dealing with faults arising from the following. If your internet keeps cutting out or slows down unexpectedly, the culprit might be closer than you think — your fiber optic patch cords. On the 1st end, we kept it pre-terminated but on the 2nd end, since the fiber optic cable remains will be huge, we cut it to the right length, thus needing to. If you accidentally break a fiber optic patch cord in your server room or in any of your switch gear, now you can repair it on the spot and get back up and running in minutes.
