

SM450 Single-Mode Fiber Optic

Overview

The Single Mode Optical Fiber for 488 - 633 nm with Ø125 µm Cladding by Thorlabs operates in the spectral range of 488 - 633 nm and features a maximum attenuation of ≤ 50 dB/km at 488 nm. Incorporated light sources are warranted for the lesser of one year or (to the extent applicable) the number of hours stated in the specifications. Maintain beam quality, and minimize attenuation and dispersion, using single mode fibers available from the visible through the infrared.
