FRINDEL OPTICS

Secondary distribution box equipped with air switch

Overview

SBC units with AirD are designed to control and protect distribution networks, motors, transformers, etc. : they are equipped with a VD4/R-Sec removable vacuum circuit breaker installed on a truck and connected to the busbars, rated up to 1250A, and AirD, a 3-position. SM AirSeT, our innovative SF6-free medium-voltage switchgear, uses pure air technology for unprecedented sustainability while delivering a higher level of efficiency and safety for the grid, commercial and industrial applications. It can be fitted with the following protection devices: Its compactness, wide range of functions and ease of installation and extensibility, make it a versatile switchboard to fit many. Square D™ brand HVL/cc metal-enclosed load interrupter switchgear with a sealed switch enclosure contains the contact arcing from switch contacts (all interruption takes place within the sealed enclosure), a critical concern in gaseous environments – Class 1 Div 2 certified. This new component has a shunt vacuum interrupter for bre king capacity, dry air as the insulation medium, and a.

Secondary distribution box equipped with air switch

UniMix Air insulated MV switchgear for secondary distribution

Air insulated MV switchgear for secondary distribution 12-24 kV

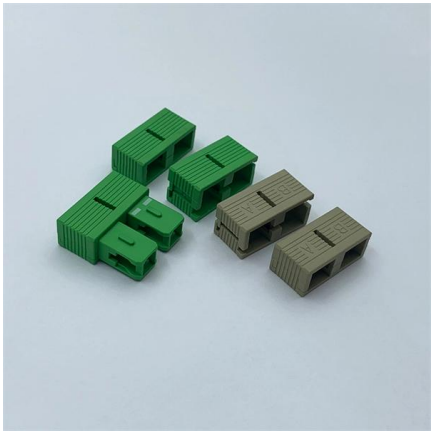

Contact Us

Air-Insulated Switchgear for Secondary Distribution

The HVL/cc switch can be equipped with either an over-toggle mechanism (OTM), which is standard, or an optional stored energy mechanism (SEM). Top or bottom cable entry enhances installation
