

Should I upgrade to a 50 Fiber Optic router

Overview

You might find that your current router is not compatible with fiber internet speeds, so you'll need a model that can deliver the 'fiber goods. 'Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber to the Property. That said, there are a ton of options out there from different manufacturers, such as Netgear, ASUS, TP-Link, and more. Future-proofing improves network longevity since Wi-Fi 6E and Wi-Fi 7 routers support advanced devices and higher speeds.

Should I upgrade to a 50 Fiber Optic router
