

Singapore Oriental Power Distribution Automation Terminal

Overview

When fully completed in 2040, the mega port will be the world's largest fully automated terminal, boasting features such as automated wharf and yard functions, and full-electric automated guided vehicles, port operator PSA said on Thursday (Oct 3). The inauguration of the first three berths during Phase One of its development in September 2022. Amid global crises, Tuas Port has streamlined its supply chain by embracing automation and establishing an innovative command centre to oversee operations Singapore's PSA Tuas Port is on the path to becoming the world's largest automated container terminal, boasting an annual handling capacity of. This achievement highlights Tuas Port's strategic significance as a cornerstone of Singapore's supply chain and logistics industry.

Singapore Oriental Power Distribution Automation Terminal

Self-healing distribution automation terminal based on IEC61850

The distribution automation terminal is the key link to realize intelligent power distribution, which is of great significance for improving the reliability rate of power supply. This paper designs
