

Single-mode fiber optic module disassembly steps

Overview

To safely remove an SFP module, follow these steps: Disable the port in your network device settings or power off the device to avoid electrical damage. Gently pull the module latch or release ring, depending on the module design. Put on safety glasses and prepare work area by organizing all necessary tools from the Fiber Termination Kit (P/N: FTERM-L2), LC Upgrade Kit (P/N: FTERM-LC) and the Consumables Kit (P/N: FT-CKIT-L2). Place primer bottle into primer stand, remove dust caps from fiber connectors, etc. In this guide, we will walk you through the step-by-step process of installing and removing SFP transceiver modules correctly and safely.
