

South Sudan Bridge Construction

Overview

Some of the grants were used for the construction of a new bridge over the to relieve traffic congestion in and improve the transportation capacity and connectivity of. The new proposed Freedom Bridge funded by (JICA) would be 560 meters long with sufficient width for both east and we. Juba Bridge, probably one of South Sudan's oldest and most important infrastructures still stands strong and serves the landlocked nation despite clocking half a century since its construction partly with funding from the Kingdom of Netherlands. South Sudan, which gained independence from Sudan in July 2011 after many years of conflict, faces a serious lack of social and economic infrastructure.
