

Special Instruments and Equipment for Optical Cables

Overview

Fiber testers provide the precision needed to install, certify, and maintain high-speed optical networks. This category includes OLTS certifiers, OTDRs, optical power meters, light sources, and visual fault locators. The portfolio ranges from solutions and equipment for enveloping, sleeving, wrapping & stacking, cast-on-strap to the assembly of automotive, motorcycle, industrial, and e-mobility batteries. Setting the standard in fiber optic measurement Welcome to the PFO website PFO supplies instruments to test and measure the performance of optical fibers and fiber-optic cables – the backbone of the telecommunications industry. In addition to selling these products, we are using them in our own production both in Slovakia and Norway.

Special Instruments and Equipment for Optical Cables

Fiber Optic Test & Installation Equipment , Fiber Testing

Shop fiber optic test and installation equipment, including OTDRs, OLTS certifiers, fusion splicers, and fiber cable assemblies for professional network work.
