

# **Specialized Energy Internet Enterprises**

## Overview

---

SPIE is the independent European leader in multi-technical services in the areas of energy and communications. With 55,000 employees, SPIE works alongside its customers to drive the energy, digital and industrial transitions. The Group of Experts in Energy-Intensive Industries in the Enterprise Europe Network focuses on fostering the sustainability and competitiveness of industries that consume significant energy resources, such as steel, chemicals, and cement. This article studies the priorities of grid companies for the development of the energy Internet industry from the three major aspects of the external environment, internal capabilities and central corporate responsibility, and according to six dimensions of market potential, market structure. Hurricane Electric operates its own global IPv4 and IPv6 network and is considered the largest IPv6 backbone in the world as measured by number of networks connected. Within its global network, Hurricane Electric is connected to over 320 major exchange points and exchanges traffic directly with.
