

Specifications of Tapered Fiber Optic Splitter

Overview

They operate over the full standard single mode range of wavelengths (1260-1650nm) and are available in 1x2 and 2x2 configurations and splitting ratios from 50:50 to 99:1. PPC high performance Fused Biconical Taper (FBT) splitters are used to split light from one fiber into multiple output fiber lines or to combine light from two fibers into one. The FC Series fiber optic coupler is based on Agiltron's fused biconical taper technology and compact packaging structure. It features good uniformity, low excess loss and very low polarization sensitivity. The split ratio describes how many output ports a splitter has relative to its input.

Specifications of Tapered Fiber Optic Splitter

Bare Fiber PLC Fiber Splitter Data Sheet , FS

FS Bare Fiber Splitters are engineered for high-density networks, offering exceptional scalability and reliability. FS PLC splitters come in a full range of 1xN and 2xN models, with customizable split ratios
