

Specifications of the XL distribution box

Overview

The electrical specifications of XL-21 type power distribution cabinets are designed to handle substantial power loads. Typical ratings include: - Rated voltage: Up to 690V AC - Rated current: 630A to 4000A - Short-circuit withstand capacity: Up to 100kA - Frequency: 50/60 Hz

The Merlin Gerin Complete Set of Power Cabinet Distribution XL-21 Series (XL-21/2000×1000×400) is a high-performance electrical distribution solution designed to meet the needs of modern power distribution systems. It serves as the central hub for receiving and distributing electrical energy in low-voltage systems up to 380V. The main distribution box adopts self-design of new components, compact structure, beautiful appearance, easy maintenance, a variety of wiring options for users to choose, it is an ideal alternative to the old XL-21 power cabinet.

Busbar Type (M Type): This version features a cabinet height of 1900mm or more, with a removable cover on.

XL-21 type low voltage distribution cabinet is suitable for three-phase AC 50/60HZ, max voltage 690V, rated current to 800A power distribution system, Used to control motor starting, power and lighting, indoor wall installation, front panel operation, front panel inspection; Cabinet is fully.
