

Spectrometer Indexer

Overview

This tool quickly identifies unknown peaks using a rich database of common functional groups and their signature absorption frequencies (in wavenumbers). Key Insight: IR spectroscopy measures the vibrational frequencies of chemical bonds. Online Spectral Database: Quick access to millions of NMR, IR, Raman, UV-Vis, and Mass Spectra. Electron Backscatter Patterns (EBSP) acquired on NORDIF EBSD systems can be indexed by the EBSP Indexer, a free indexing software which is compatible with Windows 10/11 and MacOS. From specialized import options to tools specifically designed for efficient peak and baseline analysis, Origin offers full-fledged support for those who use spectroscopy, chromatography and related techniques: Origin's many ASCII import options.

Spectrometer Indexer

Spectrometry

The Wireless Spectrometer measures emission spectra, intensity, absorbance, transmittance, and fluorescence. It easily connects to students' devices and
