Introduction to Core Switch Configuration

In this switching, transmission is determined not only by MAC address (layer 2 bridge) or source/destination address (layer 3 routing), but also by TCP/UDP (layer 4) using port Numbers that

Basic Switch Concepts and Configuration

To configure global switch parameters such as the switch hostname or the switch IP address used for switch management purposes, use global configuration mode. To access global configuration mode,

Features and Applications of Core Switches

Core Switches also provide intelligent routing, QoS assurance, security, scalability, and manageability. A well-matched Core Switch configuration is a strong support for building powerful,
