

# **Standard Optical Cross-Connect Box**

## Overview

---

The Cross Connection Cabinet (FDC) provides a secure transition point from the passive optical network (PON) to the subscriber drop for both pre-configured pigtail and/or patch and splice applications. Corning's family of optical cross-connects (OCCs) are versatile, fully enclosed cabinets designed for fiber optic rack-mountable hardware. All products in this family offer modular design for incremental growth and are ideal as outdoor protected environments for cross-connect installations.

## Standard Optical Cross-Connect Box
