

Standard Size of Electricity Meter Box and Distribution Box

Overview

Size is driven by service ampacity, phase, circuit count, meter architecture (socket, CT, bypass), and environmental/IP requirements. Typical footprints scale with 100A, 200A, 400A, and 600A+ services, with added depth for smart modules and barriers. From powering homes and industrial facilities to supporting medium-voltage infrastructure, these enclosures ensure safe, efficient, and reliable power distribution. Whether it's a small electrical breaker box in a residential property or a panel medium voltage cabinet in industrial environments. Access Meterbox Downloads to get technical documents for electric and gas meter boxes – drawings, datasheets, and install guides. Electrical enclosure sizes are not universal, but most manufacturers follow common size families. RMC Enclosures are provided with IP Level from IP-33 to IP-65 and are customized as per the customers requirements like Push Fit Type Locking System, Sensor System, with Louvers etc.
