

Suriname ADSS optical cable 24 cores

Overview

High-performance ADSS fiber optic cable with 24/48 cores, 100m span, and single sheath design. 24 Cores ADSS Fiber Optic Cable ADSS optic cable adopts loose tube layer stranded structure, and the loose tube is filled with water blocking compound. Then, two layers of aramid fibers are twisted bidirectionally for reinforcement, and finally a polyethylene outer sheath or an electric tracking. This specification covers the construction all dielectric self-supporting Optical Fiber Cable (ADSS) properties for outdoor application. Cable sheath also accommodate with application environment with PE, MDPE, HDPE and AT. Unlike conventional cables that rely on metallic strength members, ADSS cables use non-metallic.
