

The distribution box is installed outdoors

Overview

If your distribution box is installed outdoors and exposed to rain and sunlight, you need to select an electrical enclosure with a higher protection level, such as models with IP66 or NEMA 4 ratings. 7 meters) high makes it easily accessible without the need to bend or stretch excessively. It takes the incoming power and safely distributes it to different circuits throughout your building. NEC (National Electrical Code) Article 314 provides strict requirements for these installations, and for good reason. A compliant outdoor receptacle installation requires strict adherence to National Electrical Code (NEC) 406. Enclosures for indoor or outdoor locations, Types 3, 3X, 3R, 3RX, 3S, 3SX, 4, 4X, 6, and 6P.

The distribution box is installed outdoors

NEC Code for Outdoor Receptacle Installation (NEC 406.9)

NEC 406.9 provides specific rules for installing a receptacle outdoors, and the requirements hinge on whether the location is classified as "damp" or "wet."
