FRINDEL OPTICS

The function of the junction box fixing post is

Overview

A small metal, plastic or fiberglass junction box may form part of an or (TPS) wiring in a building. If designed for surface mounting, it is used mostly in ceilings, concrete or concealed behind an access panel—particularly in domestic or commercial buildings. An appropriate type (such as that shown in the gallery) may be buried in the of a wall (although full conceal. The fundamental purpose is to organize the wiring and protect those connections from external physical damage or environmental factors like moisture and dust. This electrical enclosure secures wire splices and terminations and prevents electric shock and fire. Moreover, this detailed guide serves as your ultimate resource for all aspects of junction boxes, including their functions, importance, popular types, installation.
