

The strongest communication optical cable

The strongest communication optical cable

Fiber-optic cable

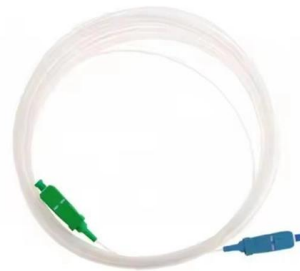

A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry light.

Fiber-optic communication

OverviewTechnologyBackgroundApplicationsHistoryParametersComparison with electrical transmissionGoverning standards

Modern fiber-optic communication systems generally include optical transmitters that convert electrical signals into optical signals, optical fiber cables to carry the signal, optical amplifiers, and optical receivers to convert the signal back into an electrical signal. The information transmitted is typically digital information generated by computers or telephone systems.
