

The switch in the distribution box cannot be pushed

Overview

Check the electrical load and ensure that the sensors do not exceed the 10 Amp maximum. Here are some solutions when a power distribution box fails:
Safety First: Make sure you are safe. Do not touch live parts, turn off the corresponding power switch to avoid the risk of electric shock. I'm trying to configure the switches in my campus fabric but I cannot push the configuration through DNA, even I have configured the SNMP, CLI, SSH username and password and assign all of these to the site but still can't push the configuration, Also wanna highlight one point here during the.
