Corning Optical Communications , Fiber Optic

We deliver optical connectivity solutions for
every segment of the network, including carriers,
data centers, in-building networks, and original
equipment manufacturers

Network convergence

Network convergence refers to the provision of telephone, video and data communication services within a single network. In other words, one company provides services for all forms of communication.

Architecture options for converged packet-optical networks

There are three main approaches to packet-optical convergence. Each has its relative merits, but one stands out.

The benefits of IP and optical convergence in transport networks

Replace long-haul DWDM transponders with 400G ultra-long-haul coherent pluggable optics that can extend the reach of transport networks up to 3000 km using the same QSFP-DD form factor.
