

UK Project Quotation Cabinet Rack-Mounted

Overview

When ordering cabinets they can be supplied in kit-form (flat-packed) for assembly on site or as completely assembled units. If you order a fully assembled server cabinet, please ensure the cabinet will fit through your doorways and into the space you. Our standard range cabinet depths include 900, 1000 and 1200mm with widths of 600 and 800mm. Please let us know if you need a site survey and this is recommended if you have standard doorways and/or need to consider lift access, stairways or hard to get to locations.
