

What are cable trays called in factories

Overview

Cable trays, also known as carriers, are a mechanical support system that holds large networks of cables together. There are several types of cable trays, including ladder, perforated, solid bottom, basket, and channel trays. Ladder type cable tray, also called cable ladder or HDG cable ladder, is the most economical cable tray which is made with prefabricated C channel metal structure processed by galvanised and hot dipped galvanised method and connected by parallel transverse rungs to provide maximum ventilation in.
