

# **What are the uses of a router with fiber optic cable**

## Overview

---

A fiber router is designed to work specifically with fiber optic internet connections, providing faster and more reliable speeds compared to a normal router that typically works with traditional broadband connections. A fiber wireless router is a purpose-built router that integrates with a fiber optic modem to deliver a fiber Wi-Fi network from your Internet service provider. Fiber optics are a transmission medium that uses pulses of light to send information over long distances at much higher speeds than conventional copper. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber.

## What are the uses of a router with fiber optic cable

---

- ✓ 50KW/100KWH
- ✓ HIGHER POWER OUTPUT IN OFF-GRID MODE
- ✓ CONVENIENT OPERATION & MAINTENANCE
- ✓ PRE-WIRED

### Fiber Router vs. Normal Router
