

What board should I plug the Huijue 330 pigtail into

Overview

Once the housings are built, you connect them to the Pinscape boards simply by plugging them in to the matching headers. Set aside any unused cables somewhere safely such as in your PSU box to potentially use in future. This is the simplest way to put it, pigtails are not "bad" they are just limited. A standard PCIe cable has six pins, with a secondary detachable 2-pin connector to form an eight-pin (6+2 pin) connector.

What board should I plug the Huijue 330 pigtail into

How to connect a GPU to the PSU

Plug the required number of PCIe cables into the Power Supply by matching the shapes of the pins. Of course, the PSU
