

## Overview

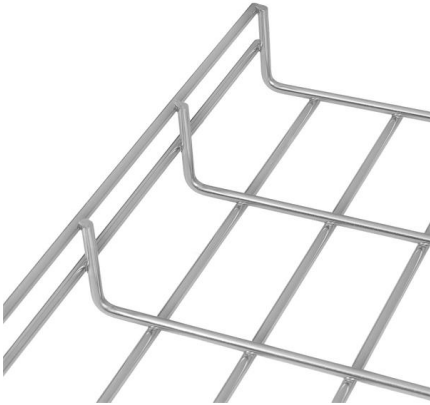

---

A "DP box," or Distribution Point box, is a type of enclosure used in telecommunications to house and organize connections, typically in a network involving fiber optic or copper cabling. It serves as a junction point where multiple lines can be terminated and distributed to. It helps organize, protect, and control electrical connections in residential, commercial, and industrial electrical systems. Let's solve the puzzles surrounding these vital gadgets and explain their importance to daily life.

## What is a DP distribution box
