

What is a multimode fiber optic distribution unit

What is a multimode fiber optic distribution unit

Multimode Fiber-Optic Cabling

Multimode fiber can carry more bandwidth than single-mode fiber, but single-mode fiber can carry signals up to 50 times farther than multimode. Read

Multimode Fiber

Multimode fiber is defined as a type of optical fiber with a relatively large core (typically 50-60 um) that can propagate multiple light modes simultaneously, making it suitable for high bandwidth applications
