

What is the diameter of an ADSS 24-core optical cable

Overview

Outdoor dry core (ADSS) optical fiber Multi Loose Tube cable with aramid yarns as strength member and polyethylene outer jacket. The aerial fiber optic solution most commonly used in medium to long-distance telecom and power utility networks is the 24-core ADSS optical fiber cable, which operates in an all-dielectric system with self-supporting design. UnitekFiber ensures a stable quality control system for our cable products through several programs including ISO 9001, ISO 14001 and ROHS. 2 The cable shall be used for aerial install levant IEC, ITU-T and EIA Recommendation or better ha 25 years without any at en ar ing can be changed w ted by a metal cover firmly secured to the flange.
