

What is the purpose of a supplemental lighting tracking module

Overview

Track lighting is an innovative and modern way of installing multiple lights from a single live feed. The versatility of the system ensures that you remain in control and create a scheme that works for you. Supplementary lighting, also referred to as additional or supplemental lighting, is the use of artificial light sources to enhance or complement the existing lighting in a space. With one electrical connection, you bring light exactly where you need it, no matter the limitations. ERCO track is the flexible and sus- Hi-trac and light structures are a With Minirail 48V, ERCO offers a tainable infrastructure for spotlights, heavy-duty track infrastructure for miniaturised alternative to the classic downlights, wallwashers and pendant suspending spotlights, downlights, ERCO.

What is the purpose of a supplemental lighting tracking module

Tracker

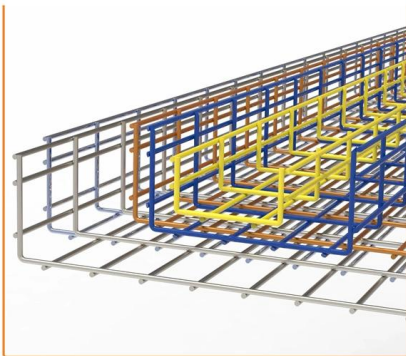

Let the Tracker guide you through the space and make your open spaces attractive and unique. It was made to support the creativity of architects and lighting designers in organized or creative compositions.
