

What router should I use for whole-house fiber optic internet

Overview

The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Instead, you simply plug a wireless router into the ONT provided by your ISP, set it up, and start using the internet. This guide will walk you through everything you need to know, from decoding tech specs to matching features to your lifestyle, so you can confidently choose the perfect fiber optic router for home and unleash the full potential of your internet.
