

What shape is the SC adapter

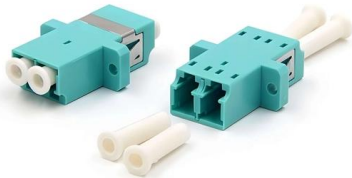

Overview

SC Adapter: The SC (Subscriber Connector) adapter has a square design with a connector diameter of 2. It typically uses a push-pull coupling mechanism, which makes installation and removal straightforward. Only high quality and high precision material are used to guarantee connections at the highest level. 5mm ferrule compatible with FC and ST via hybrid adapters, and a reliable push-pull latching mechanism. SC fiber-optic cable connectors are widely used in optical network applications, such as internet and cable TV.
