The diagram illustrates a 4-channel SDI video transmission system. On the left, a **transmitter** unit is shown. It has a **loop output** connected to a monitor displaying a blue screen. It also has four **SDI input** ports, each connected to a camera. A label **x4** indicates there are four cameras. A yellow line representing an **Optical fiber connection** runs from the transmitter to a **receiver** unit on the right. The receiver has four **4CH SDI outputs** connected to a multi-monitor display system. The text **Broadcasting system** is written in blue on the right side of the diagram.
