

# **Where should the integrated power cabinet s generator be connected**

## Overview

---

Generator DI port (please refer to the generator manual) is connected to the DO3-NC and DO3-COM ports of the Gateway controller. The power output is connected to the SMART-PORT port of the Gateway. This article explores the key aspects of electrical panels with generator hookups, installation procedures. When equipment is connected to an unsuitable power supply, exposed components may carry a hazardous voltage that might result in serious injury or death. • Only use power supplies that provide SELV (Safety Extra Low Voltage) or PELV (Protective Extra Low Voltage) output voltages for all connections.

## Where should the integrated power cabinet s generator be connect
