

Which Southeast Asian single-core pigtail is the best

Overview

SC/APC and SC/UPC connectors are both popular in fiber networks, but for FTTH and telecom use, SC/APC has distinct advantages: The SC/APC Singlemode Fiber Pigtail is clearly the better choice for high-speed, long-range, and low-reflection applications. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a. A SC/APC Singlemode Fiber Pigtail is a short piece of optical fiber with a pre-terminated SC/APC (Angled Physical Contact) connector on one end and an unconnectorized bare fiber on the other. Fiber Optic Pigtail assemblies are utilised in terminating fiber optic cables via fusion splicing. Iveonet™ offers a wide range of pigtails, designed and manufactured for demanding network applications, comprising of single mode OS1 and OS2 (9/125). The FC type fiber optic pigtail, short for Ferrule Connector, was developed in Japan.
