

Why is there no 19-splitter

Overview

Because researchers use different approaches to, their predictions of the on each chromosome varies (for technical details, see). Among various projects, the collaborative consensus coding sequence project () takes an extremely conservative strategy. So CCDS's gene number prediction represents a lower bound on the total number of human protein-coding genes.

Why is there no 19-splitter

3 Ways MMIC Power Splitter, 15000

Mini-Circuits is a global leader in the design and manufacturing of RF, IF, and microwave components from DC to 86GHz.
