

Wiring Requirements for Electrical Distribution Boxes in Construction Sites and Factories

Overview

Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. In this guide, we'll break down everything you need to know to install a distribution box correctly and confidently. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. This fact sheet explains how to apply the requirements shown in AS/NZS 3012:2019 Electrical installations – construction and demolition sites (AS/NZS 3012:2019), which is called up as a mandatory standard by section 163 of the Work Health and Safety Regulation 2025 (WHS Regulation). However, exposure to weather, frequent relocation, rough use and other conditions not normally encountered with conventional wiring systems necessitate special consideration not required in other applications or in completed structures. Choosing suitable electrical components and equipment for factories, pre-engineered steel storage building 3.
