Overview

The Hitachi X-MET8000 spectrometer is an advanced, portable X-ray fluorescence (XRF) analyzer widely used for material testing and elemental analysis across various industries. This user guide covers the following aspects to help users maximize the device's efficiency: Principles and Features of. The X-MET8000 Series Components The X-MET8000 series includes a rugged transit case as standard. Whether for sorting metals in landfills, identifying alloys in the industry, PMI, precious metals, regulatory compliance (ROHS, WEEE), etc.
