

ZN optical cable

Overview

Lightweight, metal-free and low bending radius with a small external diameter. The installation is carried in pipes, cable ducts or directly into the earth. Corning MiniXtend products are fiber optic stranded loose tube or central tube fully dielectric outdoor cable typically used in Long-Haul, Metro- or Access Networks when limited space is available. Our loose tube cable provides excellent optical transmission and physical performance. The construction of the central bundle core makes the installation of the cable convenient. These cables are easy to mount and rodent-protected, suitable for underground, tubes and channel areas, where normal tensile stresses and/or transverse compressions occur and rodent infestation is to be expected.

ZN optical cable

A-DQ(ZN)B2Y

For optical data characteristics please contact our technical department. These fibre optic cables are available with a central bundle core and stranded version (from 12 fibres and more). The construction
